REQUEST FOR CORRECTED FILING RECEIPT

Mail Stop: Missing Parts

Commissioner for Patents

P. O. Box 1450

Alexandria, VA 22313-1450

Date: August 10, 2005

Sir:

Please supply the undersigned attorney with a corrected filing receipt for the above-identified application. The undersigned also respectfully requests that the Patent and Trademark Office records be amended to reflect the correction.

In reviewing the Official Filing Receipt, we noted that the Assignee's Information was not recorded and also we noted an error in the Title. The Assignee's Information should read --**JAPAN SCIENCE AND TECHNOLOGY AGENCY, Kawaguchi-shi, JAPAN--** and the Title should read --**HEAT-RESISTANT MATERIAL Ti ALLOY MATERIAL EXCELLENT IN RESISTANCE TO CORROSION AT HIGH TEMPERATURE AND TO OXIDATION--**. A copy of the **Transmittal Letter** and the **PCT Publication** are enclosed which indicate the

correct information. We are also enclosing a copy of the filing receipt with the corrections highlighted.

In the event any fees are required in connection with this paper, please charge Deposit Account No. 50-2866.

Respectfully submitted,

WESTERMAN, HATTORI, DANIELS & ADRIAN, LLP

OC000000016486232

Date Mailed: 07/13/2005

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process simplifies the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control,

Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

(54) Title: HEAT-RESISTANT MATERIAL Ti ALLOY MATERIAL EXCELLENT IN RESISTANCE TO CORROSION AT HIGH TEMPERATURE AND TO OXIDATION

(54) 発明の名称: 耐高温腐食性、耐酸化性に優れた耐熱性Ti合金材料およびその製造方法

AA...DISTANCE IN DIRECTION TO SURFACE (μm)
BB...CONCENTRATION (ATOMIC %)
CC...Cr DIFFUSION LAYER

Ti-Al-Cr系合金

(57) Abstract: A heat-resistant Ti alloy material excellent in the resistance to corrosion at a high temperature and to oxidation, characterized in that it comprises a heat-resistant Ti alloy substrate and, formed on the surface thereof, a surface layer having a double layer structure of an inner layer, wherein three phases of β -phase, γ -phase and Laves phase in the phase diagram of a Ti-Al-Cr alloy are together present, and an outer layer comprising an Al-Ti-Cr alloy, and the outer layer has an Al concentration of 50 atomic % or more; and a method for producing the heat-resistant Ti alloy material which comprises subjecting a heat-resistant Ti alloy substrate to a chromium diffusion treatment in a single β -phase region in the phase diagram of a Ti-Al-Cr alloy, allowing γ -phase and Laves phase to precipitate from the β -phase during a cooling process, to form the inner layer wherein three layers of β -phase, γ -phase and Laves phase are together present, and then subjecting the resultant product to an aluminum diffusion treatment, to form the outer layer comprising an Al-Ti-Cr alloy having an Al concentration of 50 atomic % or more. In these above heat-resistant Ti alloy material, the diffusion of Al from a protective film to the substrate and the diffusion of components of the substrate to the outer layer are prevented, and an Al_2O_3 film having a protecting action is formed in the surface portion of the outer layer and can be restored by itself, which results in the excellent resistance to corrosion at a high temperature and oxidation of the Ti alloy material.

(57) 要約: 保護皮膜から基材へのAl拡散や基材成分の外層への拡散を防止し、保護作用のある Al_2O_3 皮膜を自己修復的に形成し、優れた耐高温腐食性および耐酸化性を耐熱性Ti合金基材に付与する。
